

Real - Time Glucose Insights. Better Diabetes Care.

IntelliGO Free is a real-time CGM solution designed to deliver accurate glucose insights, to support diabetes management and empower your patients' every day.

Key Benefits at a Glance

Warm up period 30 minutes

Quick start with minimal warm up period

Manufactural Calibrated*

No calibration needed after sensor start

Customisable Alarms & Alerts

Alerts that you can trust

Waterproof Design

Wear confidently while showering, exercising or swimming

2 placement sites

Multiple approved sites for greater comfort

Easy & Intuitive App

Simple onboarding, clear trends, actionable insights

Clinically Validated Accuracy ¹

7.81%
MARD

Accurate glucose measurements during the full wear period

99.94%
ZONE A+B

Consensus Error Grid performance demonstrating clinical reliability

95%
20/20 CRITERION

Strong concordance with laboratory reference values

Designed for accuracy.
Built for confidence.

Empower patients.
Support clinicians.

Better data.
Better outcomes.

*If glucose alerts and readings do not match symptoms or expectations, use blood glucose meter. Adjunctive CGM: measurements must be confirmed with the use of blood glucose meter to make diabetes treatment decisions. 1.IntelliGOFREE CGM Clinical Study

Designed for Patients. Built for Clinicians.

Simple & Comfortable

- Easy one-step insertion
- Lightweight and discreet
- Comfortably wearable for 14 days

Connected Care

- Shares data with caregivers
- Real-time remote monitoring
- Data sharing with HCPs

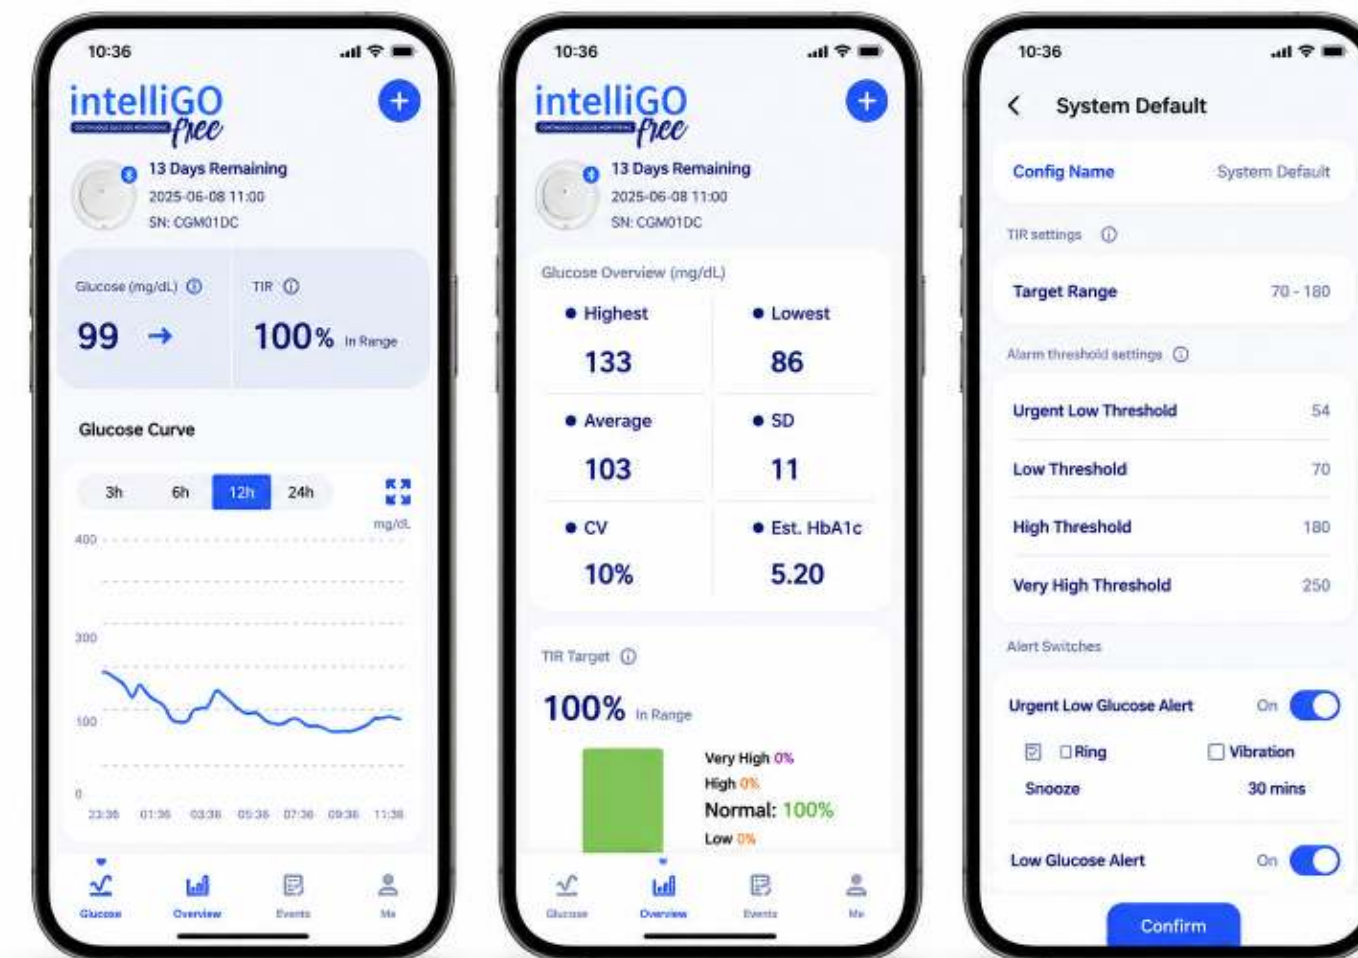

Actionable Insights

- Glucose trends
- Full AGP Report
- Pattern detection
- Custom reports

Personalized Alarms

- Thresholds alerts
- Urgent high & low alarms
- Customisable to patient preferences

Intuitive App Experience

The IntelliGO Free Sensor

Product Characteristics

Sensor Life	14 days
Sensor Dimensions	22*20*3.1 mm
Warmup period	30 minutes
Transmission Distance	8meters
Waterproof	IPX8
Placement sites	abdomen, back of arm

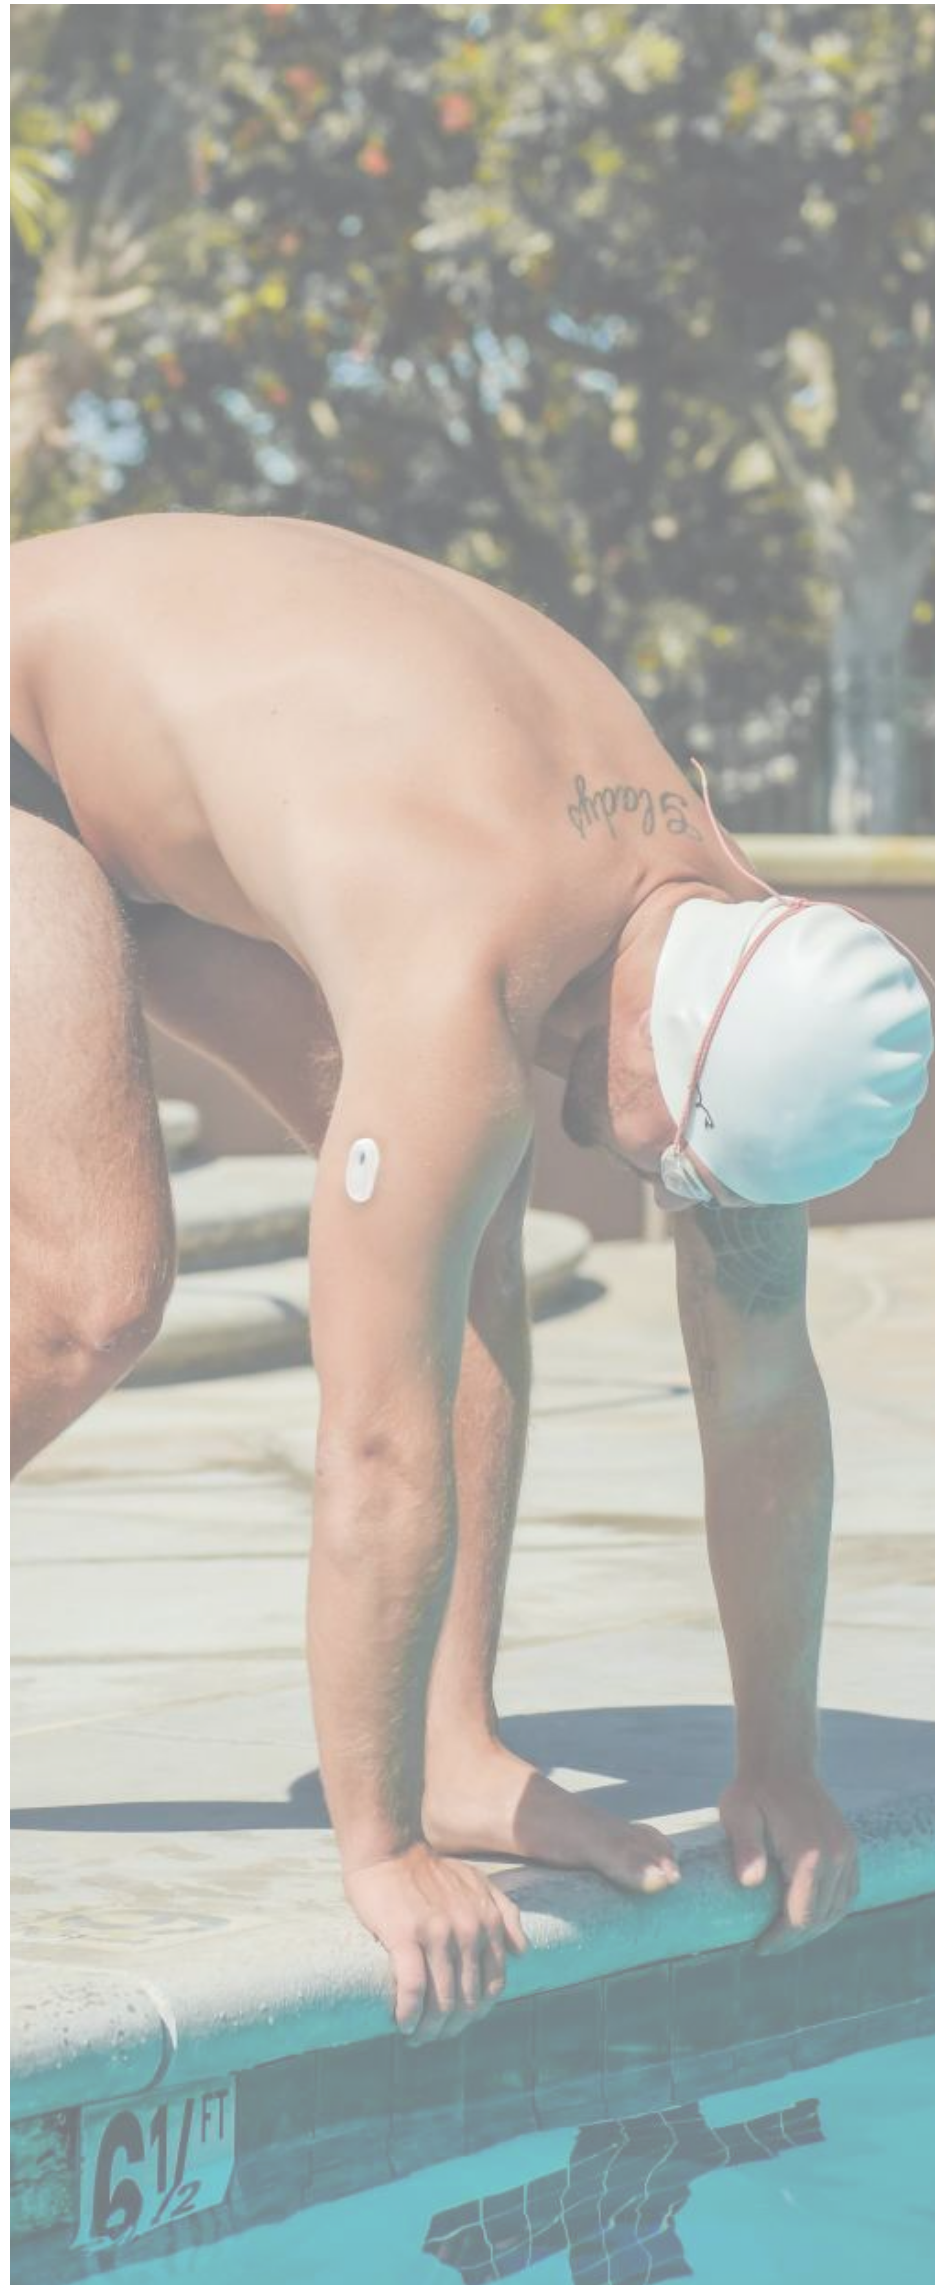

Transforming glucose data into meaningful clinical insights.

Supporting personalized diabetes care through accurate, real-time monitoring.

*If glucose alerts and readings do not match symptoms or expectations, use blood glucose meter. Adjunctive CGM: measurements must be confirmed with the use of blood glucose meter to make diabetes treatment decisions. 1.IntelliGOFREE CGM Clinical Study

Why IntelliGO Free?

- ✓ Real-time readings every 1 minute
- ✓ 14 days wear
- ✓ 7.81% MARD¹
- ✓ No calibration needed*
- ✓ Only 30 minutes warm up
- ✓ Customisable alarms & alerts
- ✓ 2 Wear locations: Upper arm & abdomen

Every Reading Matters.

Accurate, real-time glucose insights designed to support better diabetes care.
